

Sait Bozteke

Profiel

Hello, I'm Sait. I was born and raised in Turkey. After completing my primary, secondary and high school education, I studied mathematics. After working in a private school for a year, I learned English and started teaching at international schools abroad. I came to the Netherlands after working as a teacher for 6 years. As soon as I came to the Netherlands, I immediately learned Dutch. I love learning languages. Afterwards, I attended a few courses related to Programming. I loved it because it gave the feeling of learning a new language after I joined. After that day, I always learn different programming languages. My areas of expertise include learning new skills and programming languages quickly, problem solving, responsive design principles, website optimization, and code editing methods. So far I have React.js, Redux, JavaScript, HTML, CSS, Bootstrap, SASS, Python, Linux, SDLC, Agile methods, Jira, and Git/GitHub under my belt. I'm still eagerly grabbing any other programming languages, frameworks or principles that I can integrate into the coding web in my head.

Opleiding

2006-2012	NIGDE University ,	Mathematics
2014-	ZIRVE University,	Education Management
2021-2022	Clarusway,	Full Stack Development

Skills

React, Redux, JavaScript, CSS, HTML, Bootstrap, SASS, Python, Linux, SDLC, Agile methods, Jira, and Git/GitHub

Languages

Turkish

English

Dutch

Kurdish
